

# ANSWERING MACHINE

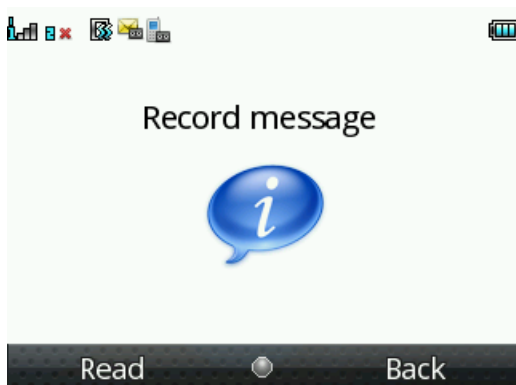

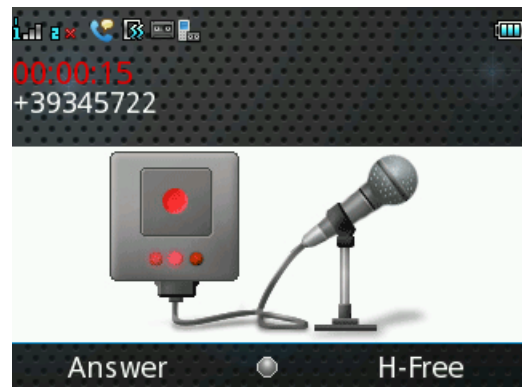

## Record voice messages on your phone

The answering machine function lets you receive and record voice messages when you cannot answer to a phone call. The recordings are saved in the phone or micro-SD memory and can be found in the “inbox” of the Answering machine menu.

Playing of the greeting message  
(you can use the pre-set one or  
record a personalized one)

Recording of the incoming voice call  
(it is possible to listen to the call  
during the recording )

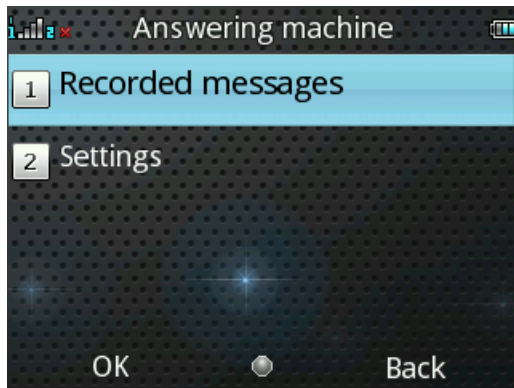

At the end of the recording a message  
on the screen will appear

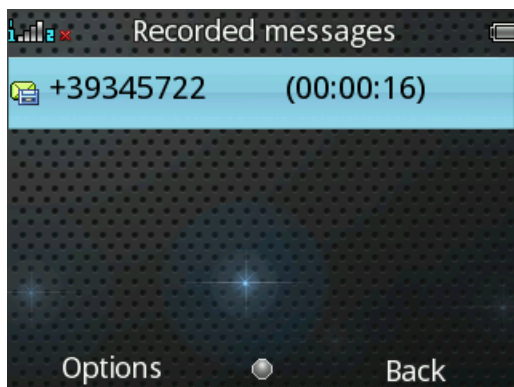

# ANSWERING MACHINE

**Automatic answering machine:** you can set answering machine to automatically answer the calls.

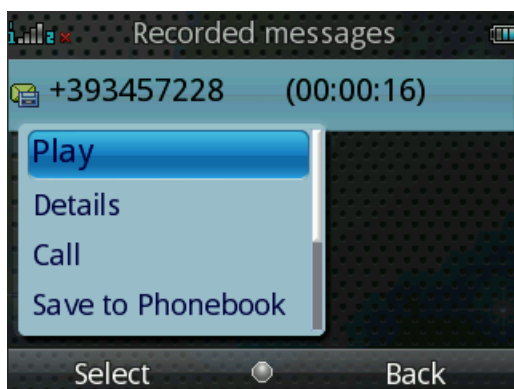

**Inbox:** Here you can find the messages recorded by the answering machine, without having to call the voice mailbox of your operator, thus saving money.

Select the «Recorded messages» in the «Answering machine» menu

Select the desired message in the «Recorded messages» menu

By selecting a message you can decide if saving it, playing it, or calling the number

# ANSWERING MACHINE

You can separately set the answering machine options on SIM1 and/or SIM2:

1. **activate/deactivate** the automatic answer;
2. select **where to save** the messages (on the phone or memory card);
3. set the **time** after which the answering machine picks up the call;
4. set the maximum **time** of recording;
5. select the default answering message or **record** your personalized one;
6. decide about the **remote access** to the answering machine through DTMF tones.

The remote control only permits listening remotely to messages, not activating or deactivating it.
